OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion

EXECUTIVE SUMMARY

- Python programming language is having an upward trend in demand
- Postgre and MySQL are the most popular and used database
- jQuery js and Vue js are will most like be the most used web frame
- Majority of the respondents are males, bachelor's degree holders, and are aged 22-36 years

INTRODUCTION

- What are the most used programming languages
- What are the most used database
- What are the most used web frame
- What Gender is mostly into technology
 - What is the Educational Level of Techies
 - What age has the highest number of Techies

METHODOLOGY

- Obtained data via web scrapping
- Used python for data wrangling and exploratory data analysis
- Used cognoz analytics to analyze and visualize the data

RESULTS

PROGRAMMING LANGUAGE TRENDS

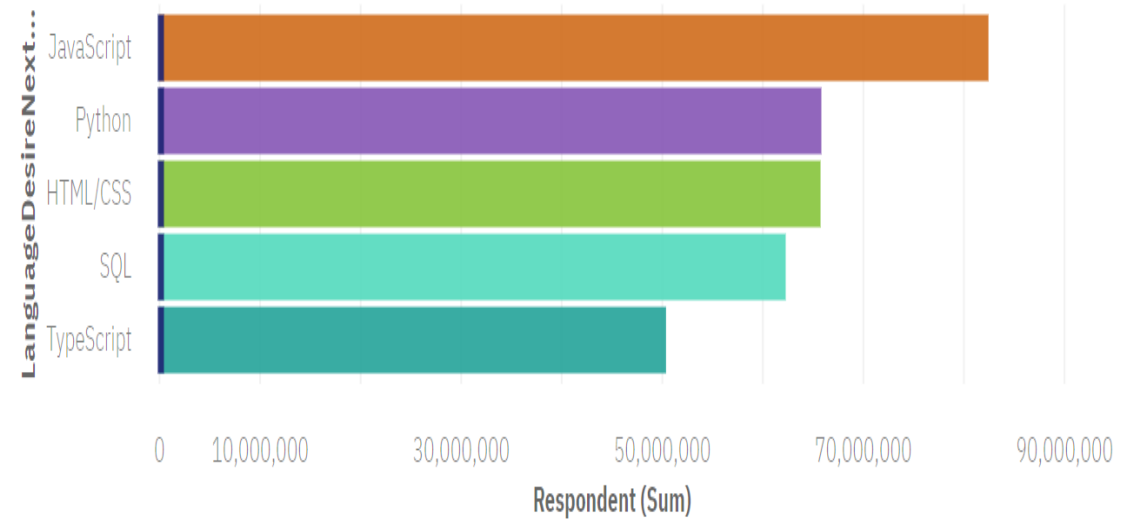

Current Year

Top 5 Languages Worked with

Next Year

Top 5 Languages Desired Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Javascript is the most used language by respondents currently and the most desired language next year
- HTML/CSS and SQL are the second and third most used language among respondents currently but is desired lesser by respondents
- Python is currently the 5th most used language by respondents now but the second most desired language by respondents next year.

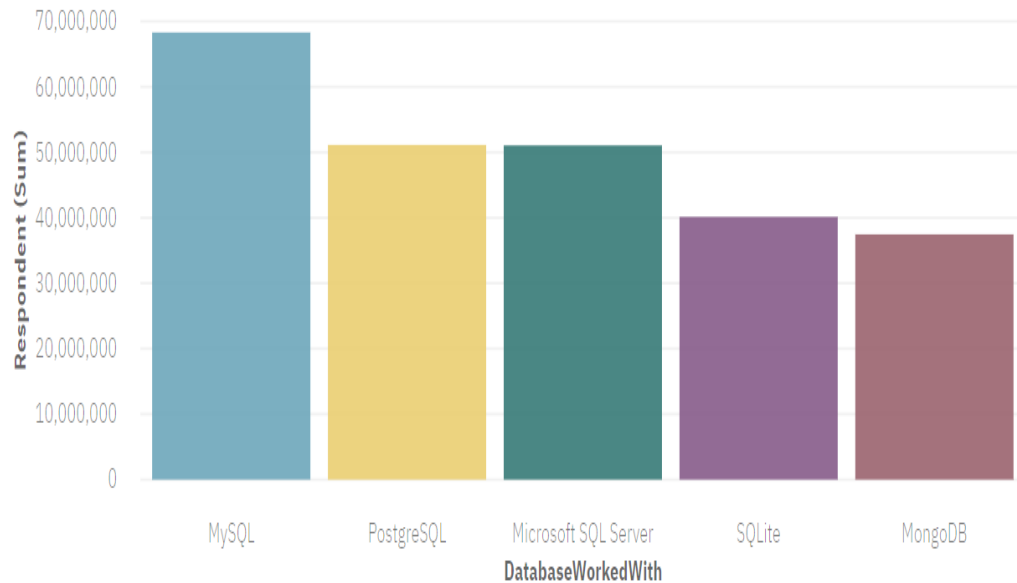

Implications

- Javascript has a wide use amongst respondents but experiencing a decrease in demand which is reflected by the respondents' desires
- Python is increasing in demand which is reflected by the 17.3% increase in the respondents desire.
- Bash/Shell/Powershell is experiencing a decline in demand as reflected by the respondents' desire

DATABASE TRENDS

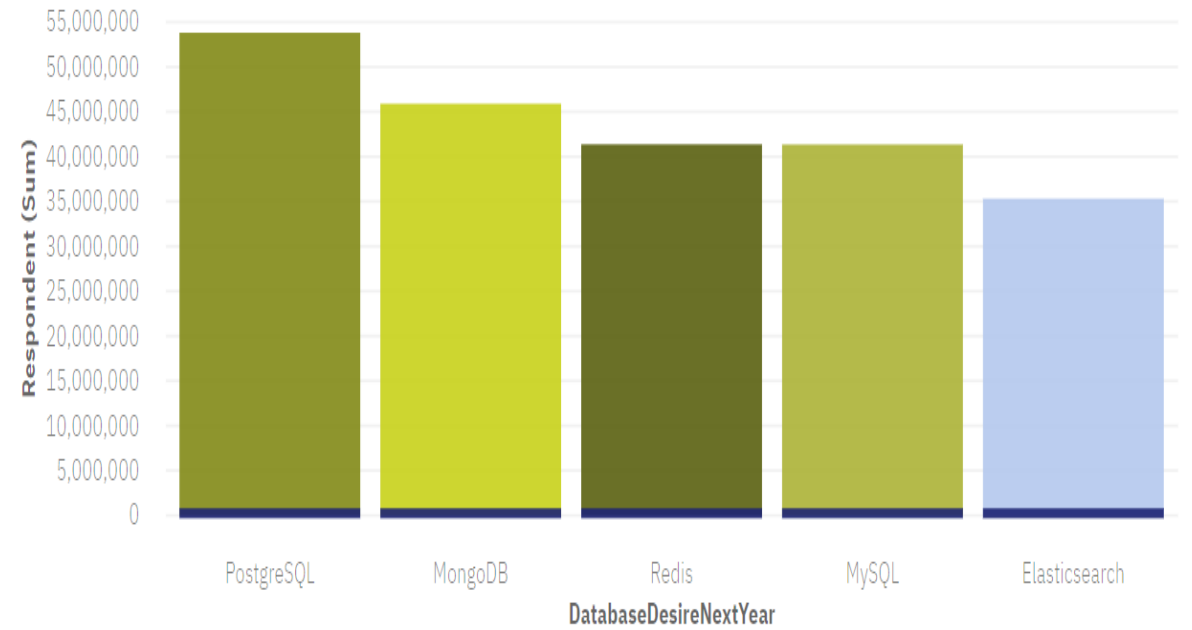

Current Year

Top 5 Database Worked with

Next Year

Top 5 Database Desired Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is the most used database amongst respondents currently, but the 4th most desired database next year
- Postgre is the second most used database now, but the most desired next year amongst respondents
- The other top 5 databases do not make it to the top 5 desired database next year respondents

Implications

- MySQL is experiencing a decline in demand and popularity amongst respondents
- Postgre is having an upward trend in demand as reflected by the respondents' desires

DASHBOARD

DISCUSSION

82% of the respondents are males with only 8% being female. There is an upward trend in the demand for Python programming language. Majority of the respondents are aged between 22-36 years. The most used platforms are windows and linux, but there is an increase in demand for Docker.

OVERALL FINDINGS & IMPLICATIONS

Findings

- Majority of the respondents are males and are aged between 22-36 years.
- Python and Postgre are the most desired language and database respectively next year.
- jQuery is the most used web frame but was 3 most desired web frame next year lagging behind react js and vue js
- react js, and vue js are the 3rd and 7th most used webframe currently but are the 1st and 2nd most desired webframe next year

Implications

- Postgre, Python, react js and vue js are having an upward trend in demand and need as indicated by the number of respondents who desire them

CONCLUSION

- The demand for Python programming language is on the rise
- jQuery js and vue js are having an exponential growth as indicated by the desire of the respondents
- Postgre is more likely to be the used database
- Majority of the respondents are bachelor's degree holders, Males and Aged 22-36 years
